

## Course: Introduction to Programming Using Python

### Module 21. Frameworks. Part 2

#### Task 1

Add the chatbot created in the previous Practice to Heroku. Test your chatbot.

#### Task 2

Create a basic wireframe for a new Telegram bot.

#### Task 3

Register your chatbot in Telegram. Set the following bot parameters:

- Bot name;
- Bot description;
- About section;
- Bot icon.

Your bot will display information about various events in the city.

#### Task 4

Add the following to the bot from Task 3:

- If the user sends the command `/date`, the bot returns all events on that date. For instance, `/date 30.08.2021`;
- If the user sends the command `/theater`, the bot returns all current and future showtimes in theaters;

- If the user sends the command /concert, the bot returns all current and future concerts;
- If the user sends the command /all, the bot returns information about all future events.

## Task 5

Add the chatbot from Task 3 to Heroku.  
Test your chatbot.
