

Course: Introduction to Programming Using Python

Module 20. Frameworks. Part 1

Task 1

Install and configure Django on your local computer.

Task 2

Create a starter app using Django.

Task 3

Configure the app from Task 2 so that it outputs “Hello, World!” to the browser.

Task 4

Create a web app that outputs the current day of the week.

Task 5

Create a web app that outputs a random quote from a list of quotes.
