

Course: Introduction to Programming Using Python

Module 1. Introduction to Python. Part 2

Task 1

Print the quote “Nothing will work unless you do” on different lines. Like this:

*Nothing
will work
unless you do*

Task 2

Print the quote “Anyone who stops learning is old, whether at twenty or eighty” Henry Ford on different lines. like this:

*“Anyone who
stops
learning is old,
whether at twenty or eighty”
Henry Ford*

Task 3

The user types in two numbers. Find the sum, difference, and product of these numbers. Display the result on the screen.

Task 4

The user types in two numbers. The first number is a value, and the second is a percentage to be calculated. Let’s say we typed in 50 and 10. The displayed number should be 10% of 50. Result: 5.

Task 5

Write a program that calculates the area of a rectangle.
The user types in the width and height of the rectangle.
