

Course: Introduction to Programming Using Python

Module 20. Frameworks. Part 5

Task 1

Create a form for entering a first name and last name. After filling in and sending data, output a greeting: “Hi, [First name Last name]!”

Task 2

The user enters the start number and end number of a range into text boxes. Output all prime numbers within this range.

Task 3

Create a form to subscribe to your company news. The user should enter the following:

- First Name;
- Last Name;
- Age;
- Gender;
- Email.

Output the data received from the user in a browser.

Task 4

The user enters the beginning and end of a range for the multiplication table. Output the table in the specified range.
