Course: Introduction to Programming Using Python

Module 3. Strings. Lists. Part 3

Task

Two lists of integers are filled with random numbers. Do the following:

- Create the third list containing elements of both lists;
- Create the third list containing elements of both lists without repetitions;
- Create the third list containing elements common to both lists;
- Create the third list containing elements that are unique to each list;
- Create the third list containing only the smallest and the largest values of each list.
