Course: Introduction to Programming Using Python

Module 21. Frameworks. Part 1

Task 1

Create a basic chatbot wireframe for Telegram.

Task 2

Register your chatbot in Telegram. Set the following bot parameters:
- Bot name;
- Bot description;
- About section;
- Bot icon.

Task 3

Add bot's reaction to user input:
- If the user types in "Hi," the bot should respond "Hi";
- If "How are you?", the response should be "Fine, thanks";
- If "Tell me about yourself," the bot should answer with brief information about itself;
- If "Bye," the bot should respond "Bye".

Task 4

Add responses in Spanish to the bot from Task 3:
- If the user sends "Hola," the bot should respond "Hola";
- If "Cómo estás?" the bot should answer "Bien. Gracias";

- If "Habla de ti," the bot should respond with brief information about itself in Spanish;
- If "Adiós," the bot should respond "Adiós".
